A Revolutionary New Treatment for PAIN

Using the Most Advanced Medical Technology Available Today.

"The ML830 Cold Laser has **clearly** proven its clinical value treating CTS and has become the industry standard."

Dr. Chadwick Smith, M.D.
Professor of Orthopedics
University of Southern California

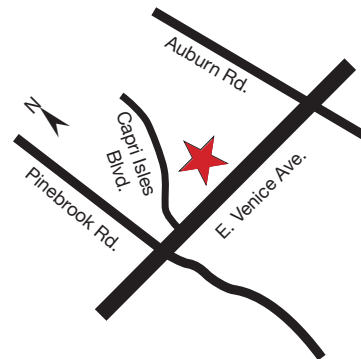

"I've never seen anything work this **effectively** and **quickly**. I believe this should be a mandated treatment prior to most surgeries."

James Ko, Physical Therapist
Star Rehabilitation Corp.

Olympic Committee Approved

The ML830 has been approved for use on Olympic Athletes and is becoming the treatment of choice!

WHAT CAN I EXPECT

In Terms of Benefit?

Reduced Pain

You may experience improvement after one treatment. Most conditions take between 2-9 treatments for complete alleviation of symptoms. Chronic conditions may require more treatment.

Reduced Inflammation

Most acute inflammatory conditions respond to 830Laser treatment immediately. You will need to follow precautions in order to avoid re-injury or the pain may return.

Increased Tissue Healing

830Laser treatment not only helps injured tissues and wounds heal faster, it also makes them stronger and less vulnerable to re-injury.

WHAT TYPE OF AILMENT

Does the 830Laser Treat?

Most muscle, joint, tendon, and nerve pain can successfully be treated with the 830Laser. See list below:

- Arthritis
- Back Pain
- Bursitis/Tendonitis
- Carpal Tunnel Syndrome
- Fibromyalgia
- Heel Spur/Plantar Fascitis
- Migraines
- TMJ
- and much much more...

Most patients feel nothing during treatment. You may experience some tingling or tapping sensations. Warmth may be felt due to the non-thermal vasodilation.

HOW DOES IT WORK?

The 830Laser sends light (photons) into your injured tissues and can penetrate 2 inches without being absorbed by the skin, fat, or blood. No heat is generated so it is safe for use anywhere* on the body. Once the photons find the injured tissues, they stimulate and energize the cells to repair and strengthen at a remarkably fast rate.

This treatment does NOT wear off like most medicines, electrical stimulation, heat or ice. It increases your body's own healing power and enhances that process--true healing. If you don't reinjure the area, the pain should not return.

HOW LONG ARE TREATMENTS?

When will I notice Results?

Treatments last between 10-40 minutes based on the severity of your conditions. Most notice results in **just one treatment** but complete improvement of symptoms may take up to 9.

Some connective tissue disorders only heal during sleep, and therefore, results may not be experienced until the next day.

IS IT SAFE?

Yes. The FDA approved this device with the only warning of "No direct contact with the eyes." This technology has been used for over 30 years in other countries such as Japan, Europe, Asia, and Canada with great success. It is finally being made available in the

United States after 12 years of study and research.

Proven safe on:

**FRACTURES
PINS & PLATES
OPEN WOUNDS**
